--	---	---	--------	---	---

Course Objectives	The course aims to provide students ability to determine prospective development areas, future trends and alternative policy options by educating them over current economip structure, its transformation, ruling macroeconomic policies, ongoing economic reforms, unsolved economic problems with a global approach.				
-------------------	---	--	--	--	--

Course Content	The course, as a complemantary course to the Turkish Economic History, focuses on current and the last decade of the economy. The economy is approached in a global scale. Every aspect of the economy is evaluated by doing comparison by other countries or country groups. Per capita income level, growth rate, unemployment rate, employment level, labor market participation rate, sectoral structure of production, share of public sector in the economy, expenditure structure, saving rate, public economy, structure of taxes systems, public debt and its structure, balance of payments and its structures are the major aspects to be studied and problems to be identified. The macroeconomic policies and reforms implemented during this period are investigated and evaluated. Hence, areas requiring reforms are revealed
